

## GIT PROCESS

- (1) Create organization corresponding to course.
- (2) Create a repository for each assignment in the course.
- (3) To add files to the repository:
  - (a) *Clone* the repository to your computer.
  - (b) Create/ save files as usual.
  - (c) Choose the files you wish to *commit*, and write a summary of your changes
  - (d) Hit *publish* to send these files to the server.
